Incredible Designs, Exceptional Quality

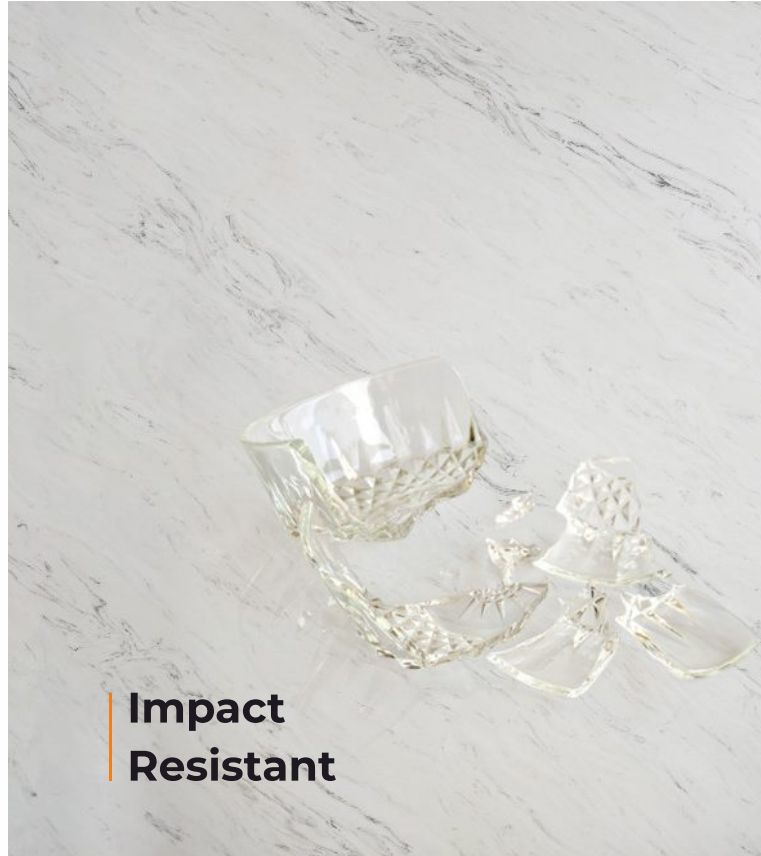

Asmi Quartz surfaces draw inspiration from the stunning Apuan mountains in Italy, combining natural beauty with the strength of quartz. Known for their durability and visual appeal, these quartz surfaces are perfect for various uses, such as kitchen countertops, vanity tops, and dining tables. They offer great versatility, functionality, and lasting beauty, making them a top choice for both designers and homeowners.

SURFACES

This stunning backsplash and countertop is made with **Calacatta Amalfi** Quartz slab.

***Crafted to
surpass
expectations***

Asmi Quartz is designed to be durable and long-lasting, resistant to scratches, stains, and heat. It's also tough against impacts, adding to its durability. Perfect for both home and commercial use, Asmi Quartz surfaces provide excellent performance and are an ideal choice for countertops that combine strength with style.

Kitchen Countertop & Island

The Asmi Quartz Collection is an excellent choice for kitchen countertops, thanks to its durability and low maintenance requirements. Quartz is non-porous, which makes it highly resistant to staining and bacteria, ensuring a hygienic surface for food preparation. Additionally, quartz countertops are scratch-resistant and can withstand the daily wear and tear of kitchen use without showing signs of damage.

Vanity Tops

Asmi Quartz offers an ideal combination of beauty and functionality. Its water-resistant properties make it suitable for wet areas, preventing water damage and mold growth. The smooth surface of quartz is easy to clean, which is essential in the humidity of a bathroom. The aesthetic versatility can complement any bathroom style, enhancing the overall appeal and adding a touch of luxury with its marble-like appearances.

Meeting Table

Quartz's scratch and impact resistance are crucial in a busy office environment where furniture is frequently used. The surface's low reflectivity ensures that it doesn't cause glare during presentations or meetings. With its wide range of designs, Asmi Quartz can be tailored to enhance the professional atmosphere of an office, providing a practical yet stylish meeting point.

Reception Desks

It is not only aesthetically pleasing but also capable of withstanding high traffic without showing wear. Quartz's resistance to chips and scratches keeps the reception area looking pristine, which is vital in creating a positive first impression. Additionally, the ease of maintenance and cleaning helps keep the reception desk hygienic and welcoming at all times.

Bretonstone technology, developed by Breton in Italy, utilizes vibro compression under vacuum to create quartz slabs composed of 93% natural quartz and 7% polymers and resins. This mix ensures quartz surfaces are both aesthetically pleasing and highly durable.

The Crystolux quartz series, made with cristobalite, offers high whiteness and resistance to yellowing, ideal for durable aesthetic surfaces. Cristobalite's exceptional purity and minimal magnetic impurities ensure a consistent appearance.

Bookmatch slabs are a stunning feature in stone and marble design, where two slabs are mirror-polished and placed side by side to create a symmetrical, visually striking pattern.
